

# BIGHANNA™ composter

## OUTLET COVER

The space between the outlet and the bin must always be covered otherwise the air is not preheated before going into the biological process. If it is not covered it will be difficult to get a good biological process.

### APPROX SIZE

L	2 300 mm
W	1 600 mm
Ø	290 mm

The cover is made extra large so please cut the cover according to the size of your bin. Picture is showing a cover before it is cut.
